Sprint 3 Backlog

- Homepage
 - (Run in Production) OAuth (*Laura*)
- Course View
 - Pinned (favorite) courses are displayed on the top of the course list. (*Rhea*)
- Student view
 - Show the student the instructor that they are assigned to when it's their turn (*Linyi*)
 - (low priority) "Freeze" their positions in line for a short period of time (they will be skipped if it's their turn, but will still keep the position)
- Instructor view
 - Remove a student from the OH queue, in case they cannot find the student after a period of time (e.g. 1 minute) and give the student a reason why they're removed (*Laura*)
 - Click a button and indicate the office hour is over (clear all the questions in the queue and all the notifications, add confirmation to be safe) (*Linyi*)
 - Send private messages to individual students
 - (low priority) View the names of TAs currently available
 - (low priority) Toggle on/off whether they are currently available to help students.
 - (low priority) Be notified after helping a student for a period of time (e.g. 10 minutes), to confirm they are still helping the student
 - (low priority) View statistics of a current or previous office hour session, e.g. total number of questions answered, average time spent per student, etc.
- Miscellaneous
 - Distinguish instructors and students (*Juncheng*)
 - TA identity, someone can be a TA for one course and student for another
 - Use a .csv file to import data (user-course pair)
